

# HYDROPOWER WORD SEARCH

You know that it's never safe to mix water and electricity at home, but did you know that large amounts of flowing water can be used to create electricity? This process of generating electricity from the movement of water is called hydropower.

Read the facts below, then find and circle the bolded words in the puzzle.

1. **Water** flowing down a river is used to spin large **turbines** that help create hydroelectricity.
2. When the turbines spin, a large **generator** spins, which creates **electricity**.
3. The amount of water used to generate hydropower is controlled through the use of large **dams**.
4. **Hydropower** is a form of renewable energy.
